for Air Conditioners

4.6 Star Product-Wide Rating | 5000+ Reviews

Core Components

Mobile App

Adjust your home's heating or cooling from anywhere on your Android or iOS device.

Smart Home

Control Mysa through your favourite smart home platforms and home assistants.

Thermostat

Mysa displays the room's current temperature on the device and provides a full range of controls so you can adjust temperature, fan speed, and modes even without Wi-Fi.

“Software is great!

The highest praise I can give is I will purchase another when my renovation is complete and I add another mini split. Great job.”

-C. Clark, Mysa for AC Beta Tester

Features

Scheduling

Use the app to set a schedule for your AC in less than a minute.

Easy Installation

Setup with plug-in adapter, mount on tabletop or wall, and pair with your AC in 15 minutes or less.

Shared Access

Share access to your account easily so others can control your Mysas through the Mysa app.

Vacation Mode

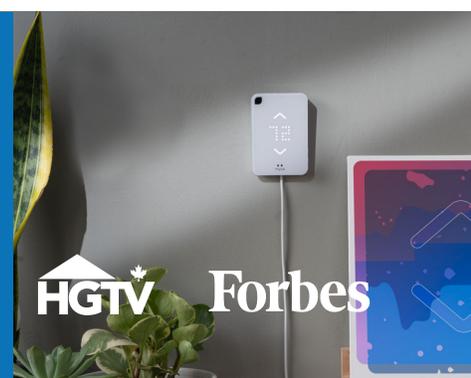

Going on vacation? Mysa will save energy while you're away.

Geolocation

Mysa can use your location to detect if anyone is home, so that you're not paying to heat or cool an empty house.

Energy Usage

Mysa shows runtime, humidity, and temperature history so you can make smart decisions about your schedule.

Say goodbye to your AC's inefficient LCD remote.

Mysa for AC replaces LCD remotes for most major brands, like:

Replaces remotes with displays for most window, ductless mini-split heat pump, or portable air conditioners.
